

The Arun

data sheet

standard ●●○

Queensbury's most popular shelter, the Arun, has become the first choice for users who require a classic, practical shelter of sturdy construction.

The Arun is a versatile shelter available in a wide variety of configurations, resulting in the shelter being able to blend into the most sensitive of locations, both rural and urban. The Arun bus shelter looks at home in villages, historic towns and major cities – a small shelter can suit a village green location, or a 50 metre shelter can be configured to suit a town centre bus interchange.

A steel, vandal resistant frame gives this shelter its strength and durability, which far out performs shelters manufactured from other materials. The roof is available in two shapes and Queensbury's own side glazing system is secure and unobtrusive, yet easily accessible for maintenance. The glazing system can accept a variety of materials from toughened glass to solid painted aluminium panels.

SIZE

The standard Arun shelter is available in two pitch sizes of 1000mm and 1290mm and five different widths.

Other sizes are available on request.

1.38m Arun
Enclosed, FL/RR, 1.29m Pitch

2.27m Arun
Enclosed, 1.29 Pitch

Arun
Special, Enclosed

1.38m Arun
Cantilever, 1.29 Pitch, NEP
