

Cycle Canopy

data sheet

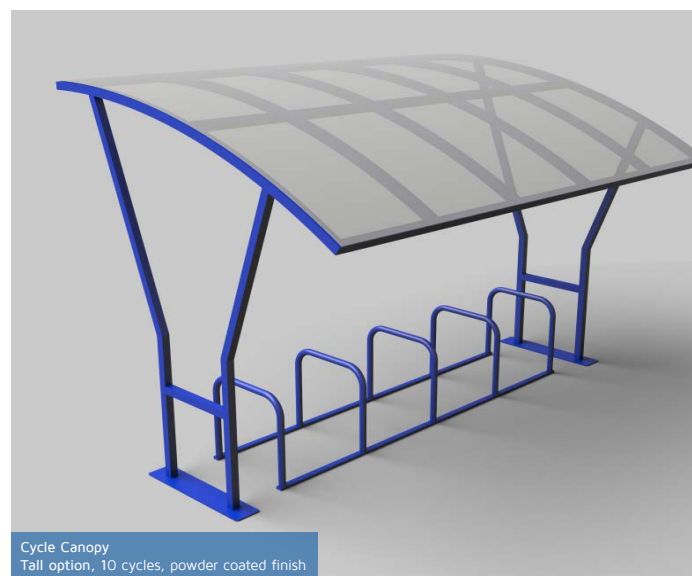

The Queensbury cycle canopy provides a contemporary storage solution for 10 cycles.

The modular design allows multiple shelters to be installed together to house a large number of cycles. The shelter is manufactured from a steel framework with a UV protected polycarbonate glazing, secured in Queensbury's aluminium glazing clamp.

The steel framework is available in two different finishes:

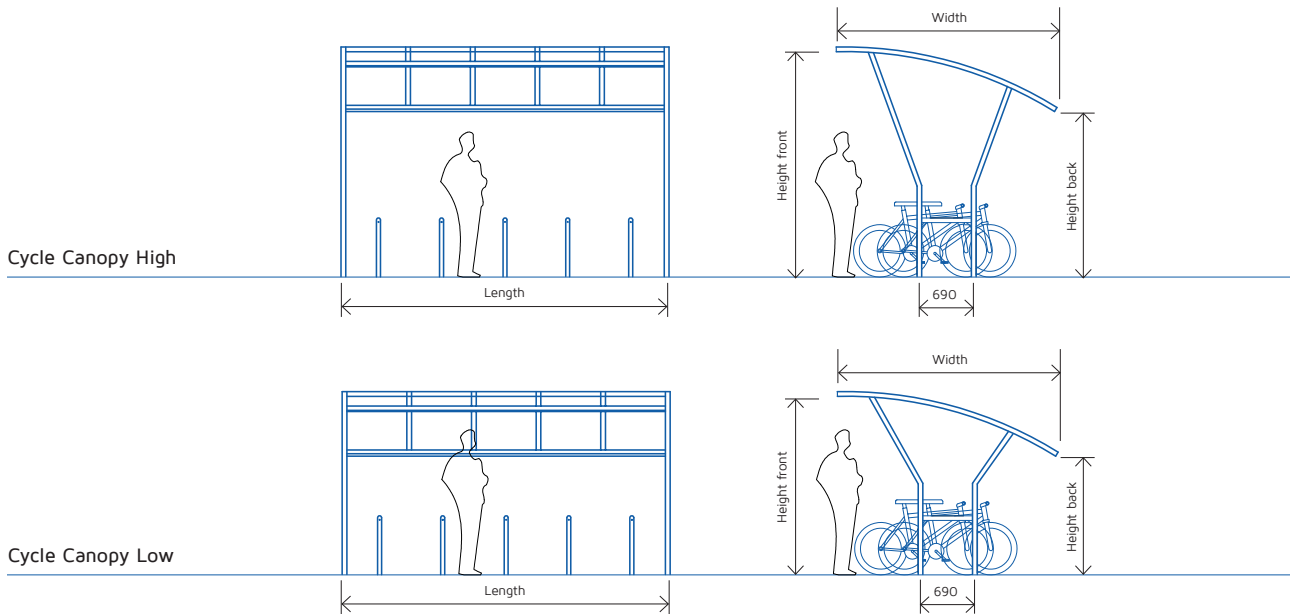

1. Zinc protected and powder coated to match any RAL colour
2. Hot dip galvanized

The canopy is available in two different heights and stainless steel fixings are used throughout.

Cycle Canopy

data sheet

| CYCLE CANOPY | | | | | |
|--------------|-----------|--------|--------------|-------------|--------|
| Type | Capacity | Length | Height Front | Height Back | Width |
