

Cycle Shelter

data sheet

The Queensbury cycle shelter is a robust shelter that can be supplied in a wide range of sizes, to suit any location.

It has a modular design, which allows multiple shelters to be installed together to house a large number of cycles.

The shelter is manufactured from a zinc protected, steel framework with UV protected PETG glazing, secured in Queensbury's aluminium glazing clamp. This provides a secure, low maintenance shelter.

This shelter can be supplied flat packed, or installed by the Queensbury installation team.

A scooter rack is also available as an accessory or standalone product.
